Recorded accruals and reversals

Account / component	09/30/2025	12/31/2025
6121 Employees	33,738.97	22,557.27
6122 Officers - Frank Brown	3,692.16	2,769.23
Total gross wages	37,431.13	25,326.50
Employer-tax accrual estimate	5,384.62	4,755.35
2400 Accrued Payroll - total	42,815.75	30,081.85

Reversals are already recorded

The September accruals reverse on October 1, 2025. The December accruals reverse on January 1, 2026. The preserved posting verification shows account 2400 returning to \$0.00 after each pair of reversals. The entries on page 6 are a record of existing journals; do not post them again.

One account-classification item remains

The four employer-tax journals were last checked on September 21, 2026 and still used 6200 Payroll Benefits. The proposed correction is to replace 6200 with 6150 Payroll Taxes in those same four journals. Completion has not been verified. Amounts, dates and account 2400 remain unchanged.

Basis and limits

Wages were calculated from the supplied payroll reports and daily time records, with management confirmations for the cutoff and officer treatment. Employer taxes are allocations of the amounts reported by payroll, not an independent validation of tax rates or wage bases. Later payroll-system tax corrections and the SUI refund review are separate matters.

Employee detail: September wages p. 2; September taxes p. 3; December wages p. 4; December taxes p. 5; recorded journals p. 6. All amounts are USD. Prepared September 21, 2026.

First October payroll + September 29-30 cutoff

Management confirmed the October 3 payroll, including Jessica Stewart's October 6 replacement, related entirely to September. Add September 29-30 wages from the following payroll period. Rates were derived from regular earnings divided by regular hours, rounded to cents; rates at cutoff were assumed unchanged.

Employee	Oct. 3 / 6 gross	Cutoff hours ¹	Rate / equiv.	Sept. 29-30 wages	Total accrual

TOTAL	31,176.01			6,255.12	37,431.13

6121 Employees \$33,738.97 + 6122 Officers \$3,692.16 = \$37,431.13. Frank is the only officer. His component is \$3,076.80 + (16 hours × \$38.46 salary equivalent) = \$3,692.16. He was not treated as an hourly employee.

¹ Cutoff hours are regular + paid leave + 1.5 × overtime hours. Employee amounts are rounded individually. Jessica's derived rate: \$1,448.97 ÷ (78.42 + 0.5 × 0.40) = \$18.43004, rounded to \$18.43. Her time file totals 78.40 hours versus 78.42 on payroll; that 0.02-hour source difference is retained.

Frank's October 17 gross differs from October 3. Management said the raise occurred in mid-November; the September wage calculation retained the October 3 basis. The source discrepancy is disclosed, not resolved by this report.

This is a book accrual estimate. It does not independently establish taxable wages at September 30, tax wage-base treatment, or whether payroll-system adjustments were calculated correctly. "Reported" means shown on the supplied payroll report.

Employer benefits/company contributions were excluded to avoid duplicating costs potentially recorded through separate bills or payments. The first October report includes \$1,594.66 of company contributions, not part of this accrual.

December 31, 2025 | employer taxes

Employee-by-employee allocation of reported January taxes

Reported employer taxes × December accrued wages ÷ full-period wages. The wage denominator excludes reimbursements. William's floating holiday and Frank's confirmed salary allocation are included. Each employee allocation is rounded to cents.

The allocation uses taxes reported on the January payroll. It does not reconstruct daily taxable wages, pretax-deduction timing, or calendar-year wage-base resets. It therefore remains an estimate of the December book expense, not a statutory tax calculation. Company contributions were excluded.
