

Test Drive Guide

A shared, live prototype of MARCO's certification process. Today we walk it together — everyone in the same system at once — and leave notes as we go, right inside the tool.

tools.caresmn.com/marco/ · no login needed

1 Getting in

Open the link. You'll land on **"Choose your role."** Pick your role, then pick the organization you're working on. That's it — no password.

2 Split up — who plays what

The magic is that we're all in it at once. For the best test, spread across the seats:

SEAT	HOW MANY	WHAT YOU'LL DO
Peer Reviewer	2 people	Read the application with the statute + documents side-by-side; score the 15 criteria. With two of you, you'll see each other's scores appear live ("the cohort").
MARCO Staff	1 person	The command center: dashboard, intake & the 13-section self-assessment, first review, scheduling & links, the board record, grievances, and the roadmap of the whole system.
MARCO Board	1 person	See the panel's recommendation and cast a vote; watch the tally update live.
RCO Applicant	if you have a 5th	See the org's own application and its determination (certified / not).

3 Two organizations to explore

Continuum Care Center Certified

A completed file that made it all the way through.

Revive Recovery Not certified

A completed file that fell short — see §1 (Conflict of Interest) and §8 (Non-Discrimination) flagged "Partially Meets."

4 Walk the flow

As a Peer Reviewer

- **Application Packet** — expand a section: the org's answer, the *exact statute*, and the documents are all right there. On Legal Structure, click a document's **"open here"** — it opens inline; the page slides left, nothing hides.

- **Written Review** — click through criteria 1–15; each is scored with a comment. Change a rating — the other reviewers see it within seconds under “How the cohort scored this.”
- **Site Visit & Panel** — notes and the recommendation, all editable.

As MARCO Staff

- **Dashboard** — the pipeline at a glance. **Schedule & Links** — find a time (send reviewers an availability link), then generate a per-person link that drops each person into their step.
- **Intake & Self-Assessment** — “+ Add a new RCO” starts a file; flip to the **Self-Assessment** tab for the real 13-section intake form with a MARCO-notes box on every section and a “resources to send back” checklist.
- **Applications & First Review** — the JotForm-killer: per-section feedback → the applicant responds → editing locks. Preview the real first-review email right from the screen.
- **Board** — the certification record: the panel's recommendation, each conflict-free member's vote, the tally, and the outcome (with the PIP or certification next-step).
- **Grievances** — file & track a grievance about a certified RCO; each one moves New → Reviewing → Resolved.
- **🗺️ Roadmap** (far-right tab) — the whole system at a glance: what's *Live*, *In progress*, and *Planned*. Start here to see everything that's built.

As Board / Applicant

- **Board** — the panel's recommendation + a live tally; cast your vote.
- **Applicant** — a green **Certified** or red **Not certified** badge over the full application.

5 Leave notes as you go — this matters most

 **Look for “Add a note” in the bottom-right of every screen.**

Anything you notice — what works, what's confusing, an idea, an edit to make — click it, **put your name**, and jot it down. It records **who wrote it, which screen, and when**. Every note lands in one place: **MARCO Staff → Record of Engagement** — our shared log for this test (and a preview of how the real engagement record will work).

6 Good to know

- **It's all live.** Everything anyone does syncs to everyone else in a few seconds — no refreshing.
- **Names are placeholders.** “Reviewer 1/2/3,” “Board Member 1/2/3” — obviously not real people yet.
- **Nothing here is precious.** This is a test set; we wipe it clean afterward and load the real records.
