Tax rates with this icon are set to not calculate separately when calculating the tax group they are associated with. As a result, if the rate is combined with other rates on a tax group (and is not the only rate in the group), then the amount shown is an approximation of the total because of rounding that takes place after calculations are complete.

NOTE: This report does not contain any information about flat taxes. Only variable tax rates and groups are included.

Flat Tax Summary Report (by month)
